## CADILLAC ESCALADE

The 2022 Escalade SUV offers the utmost high-tech and luxury features. Leather, genuine wood, and shiny metal trims line the cabin. A vast, curved digital display dominates the dashboard, uniquely serving up both infotainment and the driver displays. The Escalade's exterior draws inspiration from the gorgeous Escala concept car, scaled up to size XXL and adapted to the Escalade's boxy silhouette.

The term Escalade, Cadillac's full-size luxury SUV, refers to a siege warfare tactic of scaling defensive walls with the aid of ladders or siege towers. While we don't expect to see our clients heading off to war, the vehicle's name should give them confidence that it is built for any challenge.

The Escalade is the first choice for police, security and intelligence personnel who want superb performance and protection for political leaders and other important figures. First introduced in 2000 to compete with Ford's Lincoln Navigator, the Escalade has an imposing stance and presence. It comfortably carries eight passengers and features All-Wheel Drive for a solid grip on the worst winter roads. It spoils our clients with amenities such as mini-LED screens, satellite radio, full-screen navigation systems, individual zone heating and cooling, and a long wheelbase for more passenger legroom and a smoother ride.

The Escalade's spacious rear cargo hold can handle more than its share of our clients' luggage or sports equipment. And for those who want to keep in touch, continuous Wi-Fi is available upon request.
